## Detail changes for kits: Further developed!

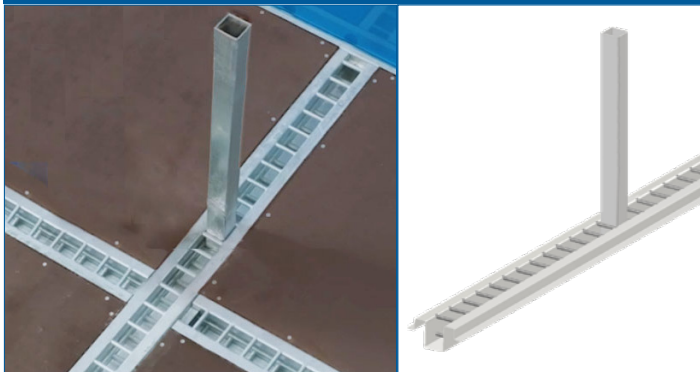

### Recessed airline tracks

- > for **Isokits BR 25x-2** with **aluminium quiet running floor** as a complete assembly
- > also for assembled **single piece floors with quiet running floor** (BR 14x-2, 248-2)
- > **now significantly more possibilities** for their arrangement and combination
- > You **divide the cargo space with partitions into 1/3 to 2/3** or **set as required positions for locking bars**

### Hot-dip galvanized Flexisafe holders

- > **NEW !** for the open platforms (**BR 190-2**)
- > **optional** in the assembled floor assembly included
- > *for the modification of other kits:* **Flexisafe floor insertion rails are loadable up to 2.2 t per lashing point**
- > **simply order matching stanchions** at the same time

### New roof corners for box kits BR 13x-2 / 13x-3

- > for van chassis (**BR 13x-2 /-3**)
- > ready mounted in the **roof assembly**
- > the contours of the **new front roof corners** now match the built-in position lights perfectly
